Final Project Manual 3
(Gargi Gajjar -01745061)

FinalProject.html:

This is the main file of this project. It will show front view, side view and top view of the house.

User can apply different transformations to each view. User can apply transformation, scale, shear and rotate.

Transformation will change the position of the house.

Scale will change the size of the house. It will change the size of the edges.

Shear will change the angles and it will shear the walls of the house.

Rotate will apply rotation to that view.
