

Computer Graphics
Final Project Report 3
(Gargi Gajjar -01745061)

Implementation:

At this point, I have applied different transformations like rotation, scaling and shear to the house. User can change the values for these transformations and can get outputs according to that input.

Future Development:

I am going to develop 3D transformation to my house object. I will also try to implement different light and viewpoints for 3D image of my house.
