

**Computer Graphics**  
**Final Project Report 5**  
**(Gargi Gajjar -01745061)**

**Implementation:**

At this point, I have implemented two dimensional view of the house which shows front view, side view and top view of the house along with three dimensional rotation of the house which also shows isometric, diametric and trimetric view of the house. In supplement, a three dimensional view of the line is added in the project.

**Future Development:**

I am planning to execute more features related to three dimensional view of the object along with ease of user interface.
