Computer Graphics

Final Project Report 1

(Gargi Gajjar - 01745061)

Implementation:

At this point, I have created front view, top view and side view of a house. User can give different size of the edge.

I understood the concepts of different views of an object and I implemented a 2D transformation of my house.

Future Development:

I am going to develop 3D objects. I will try to develop 3D image of my house. I will also try to give it different transformations like translate, rotate, scale and shear.
